

Platform edges for the renovation of the station Sint-Pieters, Ghent, BELGIUM

Location: Gent (BE)

Transportation & Mobility

Project details

Urbastyle was chosen to supply platform edges for the renovation of the platforms of the Ghent Sint-Pieters railway station. The station Ghent-Sint-Pieters dates from the 1913 World Exhibition and is protected. Thanks to this project, a whole new part of the city has developed. The station and its surroundings had to be adapted to current needs, which is why thorough renovation works of the same size as those of 1913 were started in 2010. Behind the old building, a...
