

Entrance Skyhall - Brussels Airport

Location: Zaventem (BE)

Public Space

Project details

For the renovation of the Skyhall building in Zaventem, we supplied various concrete elements for the surrounding area. You can find Scenic slabs (Finerro soft - ground + slightly shotblasted), anti-parking bollards, pedestals for information boards, seating blocks and benches. All in a beige colour and fino (polished) finish. Note that the granulates of the tiles and the furniture are matched to obtain a uniform entity.
